Re: Notification of Potentially Interested Party of EPA's Forthcoming Proposed Cleanup Plan for the Industri-plex Superfund Site, Operable Unit-2, and including Wells G&H Superfund Site, Operable Unit 3, Aberjona River Study, Woburn, Massachusetts

Dear George D. Whitten:

The United States Environmental Protection Agency ("EPA") has evaluated information in connection with its investigation of the Industri-plex Superfund Site, Operable Unit-2, and including Wells G&H Superfund Site, Operable Unit 3, Aberjona River Study, Woburn, Massachusetts ("Site").

EPA is in the process of selecting a cleanup remedy for the Site. Based upon information contained in title documents and site-related records, the Agency believes that Juniper Advisory Services may have a special interest in this Site. EPA's proposed cleanup plan to address the contamination at the Site (referred to as the preferred alternatives) is summarized in the document known as the Proposed Plan, which is attached to this letter. EPA is providing Juniper Advisory Services, as well as the interested public, with a copy of the Proposed Plan so that they have an opportunity to participate in the remedy selection process. The Proposed Plan describes the Site, EPA's preferred remedy, and ways in which Juniper Advisory Services and the interested public may participate in the remedy selection process.

If you should have any legal questions regarding this letter or Proposed Plan, please contact John Beling at (617) 918-1712. If you have any technical questions regarding the Proposed Plan, please contact Joseph LeMay at (617) 918-1323.

Thank you for your attention to this very important matter.

Sincerely,

A handwritten signature in black ink, appearing to read 'R. Cianciarulo', with a stylized, looping flourish at the end.

Robert G. Cianciarulo, Chief
MA Superfund
Office of Site Remediation & Restoration
